

CORRECT Lamp Corrected Lamp Lamp Into the GamTube defenderseent lamp into the GamTube Maintaining vertical alignment the entire time. If the lamp is too long to install GamTube vertically, lay the GamTube flat across tabletop, gently inserting the fluorescent tube horizontally.

WRONG

Do not insert the lamp at an angle as this will allow the GamTube to fold into a crease that will cause the leading end of the fluorescent lamp to drag and catch. This slows down the process of putting the GamTube on the fluorescent lamp.
